

Vaccinations of children aged between 5-11 years from 17/12/2021

From Friday, 17/12/2021, children between 5-11 years will be vaccinated between 1:00 pm and 7:00 pm in the former vaccination centre in Hürth. The district thus supports the offer of the pediatricians' practices. The appointments can be booked online via the appointment booking portal rek.impfsystem.de under the menu item child vaccinations. Vaccinations are only given at booked appointments.

Only the vaccine approved in the European Union for children from BioNTec is vaccinated. As a rule and whenever possible, the vaccination is carried out by pediatricians. IMPORTANT: The form on the left (declaration of consent for both custodians) is filled out and, if possible, signed by both custodians, along with the other documents that you receive when booking an appointment, to be brought to the vaccination. The presence of a custodian is enough! If only one person with custody signs, this person confirms that the consent of the other person with custody has been obtained.
